AFTERNOON

Niagara Falls

The name of Niagara Falls comes from the Indian language, which means "water of the god of thunder". It is the general name of three waterfalls on the Niagara River in the Great Lakes region of North America. It is known as the world's three major transnational waterfalls along with Iguazu Falls and Victoria Falls. Niagara Falls is famous for its beautiful scenery, huge hydroelectric power generation capacity and extremely challenging environmental protection projects. The entire waterfall spans Ontario, Canada and New York State, USA, forming the Niagara Gorge in the south. Among them, the Horseshoe Falls is located on the border between the United States and Canada, and the American Falls are all located in the United States and separated by Goat Island. The smaller Bridal Veil Falls is also in the United States, separated from the American Falls by Luna Island.

Voyage to the Falls Boat Tour

The Niagara Falls boat is always the most famous way to have fun at Niagara Falls. Put on a thin red raincoat, take the white double-decker cruise ship, and the most exciting waterfall trip will begin. The Niagara Falls boat, which looks quite historic but very sturdy, will bravely sail all the way from the river bank to the waterfall and enter the horseshoe-shaped center circle of the waterfall. The abundant river water rushes towards you like a thousand horses galloping. Suddenly, the strangers on the boat seem to become the same boat. In the hazy water, you can personally feel the momentum and power of the waterfall. After leaving the storm circle, the cruise ship is like a small boat that has returned from a disaster, swaying towards the American Falls. When the weather is clear, the sunlight and water vapor interweave to form a long and beautiful rainbow, projected in front of the veritable "Rainbow Bridge".

Table Rock Centre

At the edge of the Horseshoe Falls you'll find the famous Table Rock Complex, where millions of people from around the world travel every year for a first-class view of the majestic Niagara Falls. The "Table Rock" got its name from a large rock shelf that used to sit a little further north of where the Table Rock

Complex stands today. It has fabulous lookout points that place you mere yards away from the thundering Horseshoe Falls. From here, you will experience the thrill of watching 2,800 cubic meters of water crash down to the base of the Falls below. Experience a two-level indoor viewing gallery called the Grand Hall, where a panoramic views of the falls can be appreciated up close!

Skylon Tower

The Skylon Tower allows visitors to get a better view of Niagara Falls. It is the closest tower to the Horseshoe Falls. It is over 100 meters high. Half of the elevator leading to the observation deck on the top of the tower is inlaid with glass, so you can enjoy the scenery while the elevator is going up and down. There are theaters and game venues in the tower, and the top floor is a revolving restaurant. You will have the opportunity to enjoy a meal in the famous 360-degree revolving restaurant, or enjoy a more family-friendly casual dining in the Summit Suite buffet restaurant in the tower. The beautiful scenery is in full view. Whether it is a romantic meal for two or a family vacation, you can enjoy the luxurious and superior dining environment and world-class culinary cuisine! During the dining period, Ride-to-the-Top and Indoor/Outdoor Observation Deck Niagara Falls are free to enter.

Niagara Whirlpool State Park

The Niagara Whirlpool is 125 feet deep and was formed by water erosion 7,500 years ago. It is located where the Niagara River suddenly turns northeast from the northwest. The rapid river water flows back after the change of direction, forming a huge whirlpool. The park is very quiet, with barbecue pits and picnic tables. Standing on them, you can overlook the whirlpool below, which is very spectacular.
